JENNIFER ECKHART, :
Plaintiff, : Civil Case No. 1:20-cv-05593
: (RA)(GWG)
: :
v. :
: :
FOX NEWS NETWORK, LLC and ED HENRY, :
in his individual and professional capacities, :
: :
Defendants. :
-----X

**PROTOCOL FOR THE DISCLOSURE, SEARCH AND PRODUCTION OF
ELECTRONIC SYSTEMS AND ELECTRONICALLY STORED INFORMATION**

Plaintiff and Defendants (the “Parties” or “Party” when singular) hereby agree to the following protocol (“ESI and Discovery Protocol”) for the production of electronically stored information of Defendants Fox News Network, LLC and Ed Henry (“Defendants”) and any affiliate company that is in the possession, custody, or control of Defendants’ ESI. Nothing in the protocol shall limit a Party’s right to seek or object to discovery as set out in applicable rules or object to the authenticity or admissibility of any ESI produced in accordance with this protocol.

I. DEFINITIONS

In addition to terms defined throughout this ESI and Discovery Protocol, the following definitions shall apply:

1. “Fox” shall mean Defendant Fox News Network, LLC.
2. “Henry” shall mean Defendant Ed Henry.
3. “ESI” shall mean Electronically Stored Information.
4. “Privileged Material” shall mean any discovery protected from disclosure by any applicable law, rule order, agreement or stipulation that protects such material from disclosure.
5. “Producing Party” shall mean the Party producing any particular discovery.
6. “Receiving Party” shall mean the Party receiving any particular discovery.

II. GENERAL AGREEMENTS

1. Scope Of Discovery: The standards, limits and scope of discovery shall be governed by the Federal Rules of Civil Procedure (“FRCP”). The Parties agree to meet and confer in good faith with regard to any discovery disputes, and any dispute the Parties cannot resolve amicably shall be resolved by the Court. Nothing in this ESI and Discovery Protocol shall be deemed as a waiver of the right of any Party to object to any Request for Production, Interrogatory or other discovery request.

2. No Designation Of Discovery Requests: Productions of ESI in the reasonably usable form set out in this protocol need not include any reference to the requests to which a document or other ESI may be responsive, including but not limited to the Parties need not identify by Bates number which messages, emails and attachments are responsive to which requests.

3. Clawback of Privileged Documents: The production of any material constituting or containing attorney-client privileged information or work-product, or constituting or containing information protected by applicable privacy laws or regulations (“Privileged Material”), shall be governed by provisions contained in the FRCP 26(b)(5)(B) and/or any stipulation entered into by the Parties and So-Ordered by the Court. The production of Privileged Material may not be a waiver of the privilege or protection from discovery in this case or in any other federal or state proceeding and may not by itself constitute a waiver by the producing party of any claims of privilege or work-product immunity, either as to the specific information disclosed or as to any other information disclosed or as to any other information relating thereto on the same or related subject matter.

Upon written notification from the party producing the material (“Producing Party”) to the receiving party (“Receiving Party”) identifying disclosed Privileged Material, the Receiving Party shall not review the disclosed Privileged Material in any respect; shall within seven days return, sequester, delete or destroy all copies of the disclosed Privileged Material (including any and all work-product containing such Privileged Material, including but not limited to all notes and other materials referring to the Privileged Material); shall take reasonable steps to retrieve such Privileged Material if the Receiving Party disclosed it before being notified; and shall make no further use of such Privileged Material (or work product containing such Privileged Material). The Producing Party must promptly provide a privilege log for the claimed Privileged Information consistent with Local Civil Rule 26.2.

III. FORM OF ESI PRODUCTION

1. Production In Reasonably Useable Form: Parties shall produce ESI in connection with this protocol in reasonably usable form. Except as stated in paragraph II.2 below or as agreed hereafter by the Parties, such reasonably usable form in connection with this protocol shall be the single-page, TIFF-image format with extracted or OCR text and associated metadata as set out in Attachment A, which is incorporated in full in this protocol. If the receiving Party seeks production in native format of specifically identified ESI produced originally in TIFF-image form, the producing Party shall respond reasonably and in good faith to any such request. This shall be limited to tailored requests for metadata for reasonable articulable purposes and/or

documents produced in or non-usable format. Parties may produce documents in native format in lieu of producing documents pursuant to the format set forth in Attachment A.

2. Documents Subject To Production In Native Format and Structured Data:

Electronic spreadsheets (e.g., Excel) and audio/video multimedia files that have been identified as responsive shall be produced in native format. The Parties understand and acknowledge that certain categories of ESI are structurally complex and do not lend themselves to production as native format or other traditional formats, including TIFF-images. To the extent a response to discovery requires production of ESI contained in a database or other structured data, the Parties shall negotiate appropriate parameters for querying the database for discoverable information and generating a report in a reasonably usable and exportable electronic file (for example, Excel, CSV, PDF) or other format.

3. Deduplication: Defendants are only required to produce a single copy of a responsive document, and Parties should de-duplicate responsive ESI across all custodians, provided, however, that all custodians who sent, received or were copied (including blind copied) on such email exchange are identifiable in the load file. Defendants will run deduplication of emails and other ESI using industry standard review platform technology.

IV. SEARCH OF FOX'S CORPORATE ESI SYSTEMS

1. Search Terms. The Parties shall meet and confer to discuss the use of reasonable search terms, custodians, file types and date ranges (“Search Protocol”) which will apply to the following ESI systems: Defendant’s corporate email systems including all files and folders contained therein, including, without limitation, inbox, outbox, deleted, trash and draft folders and the fields “TO”, “FROM”, “CC”, “RE” and the body.

2. Review of Search Term Protocol Hits. Defendants shall retain the sole right and responsibility to conduct the searches of its data files. Nothing contained herein is intended to or shall serve to limit Defendants’ right to conduct a review of documents, ESI or information (including metadata) for relevance, responsiveness and/or segregation of privileged and/or protected information before production. The fact that any electronic file has been identified as being “hit” by a search term shall not prevent Defendants from withholding such file from production on the grounds that the file is not responsive to any discovery request or is protected from disclosure as Privileged Material. However, to the extent any document responsive to a discovery request is withheld on grounds of any applicable privilege, such document must be identified in a privilege log. In addition, Defendants shall not be limited regarding the manner in which they choose to conduct document review.

3. No Limitations Assumed. Nothing in this agreement shall limit Plaintiff’s right to seek additional custodians and/or keywords to be applied to the ESI and Discovery Protocol at any point during discovery. The Parties shall meet and confer in good faith on any such requests before seeking the Court’s intervention.

4. Known Documents. For the avoidance of any doubt, to the extent Defendants are aware of a document that is responsive to Plaintiff’s discovery requests, the failure to

produce (or log in a privilege log) such a document shall not be justified on the basis that such document was not a “hit” under the Search Term Protocol.

V. PERSONAL AND OTHER ACCOUNTS

1. Individual Defendant Henry: Any Individual Defendants shall conduct a thorough and diligent search of their personal documents, personal email accounts (including all folders), personal workstation or other personal computer, personal cloud storage, personal cellular phones, social media accounts, and any other ESI that may contain information responsive to Plaintiff's discovery requests. These documents may be produced in word searchable PDF format. This paragraph is not intended to limit the obligations or expand the obligations of the Individual Defendants to search and produce documents pursuant to the FRCP or the obligations to search emails and other ESI as described herein. The search terms provided in Attachment B shall only be run against the Individual Defendant's email boxes.

2. Plaintiff: Plaintiff shall conduct a thorough and diligent search of her personal documents, personal email accounts (including all folders), personal workstation or other computer, personal cloud storage, personal cellular phones, social media accounts and any other ESI that may contain information responsive to Defendants' discovery requests. These documents may be produced in word searchable PDF format. This paragraph is not intended to limit the obligations or expand the obligations of the custodians named herein to search and produce documents pursuant to the FRCP or the obligations to search emails and other ESI as described herein.

VI. OTHER SOURCES OF INFORMATION

To the extent there are additional sources of information responsive to a discovery request are not specifically referenced herein, the Producing Party shall have an obligation to search such sources for responsive ESI consistent with the obligations of the Scheduling Order. If a source of potentially responsive information is expansive and a Party believes such a source is not proportional or is otherwise objectionable, the Parties shall meet and confer and attempt to devise a search term or other protocol and attempt to ease the volume and/or burden on the Producing Party.

ATTACHMENT A

A.1. Image Files. Files produced in *.tif image format will be single page black and white *.tif files at 300 DPI, Group IV compression. To the extent possible, original orientation will be maintained (*i.e.*, portrait-to-portrait and landscape-to-landscape). Each *.tif file will be assigned a unique name matching the production number of the corresponding page. Such files will be grouped in folders of no more than 1,000 *.tif files each unless necessary to prevent a file from splitting across folders. Files will not be split across folders and separate folders will not be created for each file. Production ("Bates") numbers shall be endorsed on the lower right corner of all images. This number shall be a unique, consistently formatted identifier that will:

be consistent across the production;
contain no special characters; and
be numerically sequential within a given file.

Bates numbers should be a combination of an alpha prefix along with an 8-digit number (e.g. ABC00000001). The number of digits in the numeric portion of the Bates number format should not change in subsequent productions. Confidentiality designations, if any, will be endorsed on the lower left corner of all images and shall not obscure any portion of the original file.

A.2. File Text. Except where ESI contains text that has been redacted under assertion of privilege or other protection from disclosure, full extracted text will be provided in the format of a single *.txt file for each file (*i.e.*, not one *.txt file per *.tif image). Where ESI contains text that has been redacted under assertion of privilege or other protection from disclosure, the redacted *.tif image will be OCR'd and file-level OCR text will be provided in lieu of extracted text. Searchable text will be produced as file-level multi-page UTF-8 text files with the text file named to match the beginning production number of the file. The full path of the text file must be provided in the *.dat data load file.

A.3. User-Created Files: Word processing files, presentation files, spreadsheet or worksheet files, and all other produced user-created files, including without limitation *.doc, *.docx, *.ppt, *.pptx, *.xls, *.xlsx will be produced in the above format with tracked changes and comments showing. To the extent there is hidden content such as tracked changes, hidden columns, mark-ups, notes, it shall be expanded and rendered in the image file.

A.4. Parent-Child Relationships. Parent-child relationships (*e.g.*, the associations between emails and their attachments) will be preserved. Email and other ESI attachments will be produced as independent files immediately following the parent email or ESI record. Parent-child relationships will be identified in the data load file pursuant to paragraph A.14 below.

A.5. Dynamic Fields. Files containing dynamic fields such as file names, dates, and times will be produced showing the field code (*e.g.*, “[FILENAME]” or “[AUTODATE]”), rather than the values for such fields existing at the time the file is processed or imaged.

A.6. English Language. To the extent any data exists in more than one language, the data will be produced in English, if available. If no English version of a file is available, the Producing Party shall not have an obligation to produce an English translation of the data.

A.7. Embedded Objects. Some Microsoft Office and .RTF files may contain embedded objects. Such objects typically are the following file types: Microsoft Excel, Word, PowerPoint, Project, Outlook, and Access; and PDF. Subject to claims of privilege and immunity, as applicable, objects with those identified file types shall be extracted as separate files and shall be produced as attachments to the file in which they were embedded.

A.8. Compressed Files. Compressed file types (i.e., .CAB, .GZ, .TAR, .Z, .ZIP) shall be decompressed in a reiterative manner to ensure that a zip within a zip is decompressed into the lowest possible compression resulting in individual files.

A.9. Encrypted Files. The Producing Party will take reasonable steps, prior to production, to unencrypt any discoverable electronically stored information that exists in encrypted format (e.g., because password-protected) and that can be reasonably unencrypted.

A.10. Scanned Hardcopy Documents

In scanning hardcopy documents, multiple distinct documents should not be merged into a single record, and single documents should not be split into multiple records (i.e., hard copy documents should be logically unitized).

*If a producing Party is requested, and agrees, to provide OCR text for scanned images of hard copy documents, OCR should be performed on a document level and provided in document-level *.txt files named to match the production number of the first page of the document to which the OCR text corresponds. OCR text should not be delivered in the data load file or any other delimited text file.*

In the case of an organized compilation of separate hardcopy documents—for example, a binder containing several separate documents behind numbered tabs—the document behind each tab should be scanned separately, but the relationship among the documents in the binder should be reflected in proper coding of the family fields set out below.

A.11. Production Numbering. In following the requirements of Paragraph A.1, the Producing Party shall take reasonable steps to ensure that attachments to documents or electronic files are assigned production numbers that directly follow the production numbers on the documents or files to which they were attached. If a production number or set of production numbers is skipped, the skipped number or set of numbers will be noted. In addition, wherever possible, each *.tif image will have its assigned production number electronically “burned” onto the image.

A.12. Data and Image Load Files.

Load Files Required. Unless otherwise agreed, each production will include a data load file in Concordance (.dat) format and an image load file in Opticon (*.opt) format.*

Load File Formats.

- i. **Load file names should contain the volume name of the production media. Additional descriptive information may be provided after the volume name. For example, both ABC001.dat or ABC001_metadata.dat would be acceptable.**
- ii. **Unless other delimiters are specified, any fielded data provided in a load file should use Concordance default delimiters. Semicolon (;) should be used as multi-entry separator.**
- iii. **Any delimited text file containing fielded data should contain in the first line a list of the fields provided in the order in which they are organized in the file.**

*Fields to be Included in Data Load File. For all documents or electronic files produced, the following metadata fields for each document or electronic file, if available at the time of collection and processing and unless such metadata fields are protected from disclosure by attorney-client privilege or work-product immunity or otherwise prohibited from disclosure by law or regulation, including the European Data Privacy Regulation, will be provided in the data load file pursuant to subparagraph (a), above, except to the extent that a document or electronic file has been produced with redactions. The term “Scanned Docs” refers to documents that are in hard copy form at the time of collection and have been scanned into *.tif images. The term “Email and E-Docs” refers to files that are in electronic form at the time of their collection.*

Field	Sample Data	Scanned Docs	Email and E-Docs	Comment
PRODBEG [Key Value]	ABC000000 01	Yes	Yes	Beginning production number
PRODEND	ABC000000 08	Yes	Yes	Ending production number
PRODBEGATT	ABC000000 09	Yes	Yes	Beginning production number of parent in a family
PRODENDATT	ABC000010 05	Yes	Yes	Ending production number of last page of the last attachment in a family

CUSTODIAN(S)	Smith, John	Yes	Yes	Custodian(s) that possessed the document or electronic file—multiple custodians separated by semicolon
NATIVEFILE	Natives\001\001\ABC00000001.xls	N/A	Yes	Path and file name for native file on production media
FILEDESC	Microsoft Office 2007 Document	N/A	Yes	Description of the type file for the produced record.
FOLDER	\My Documents\Document1.doc	N/A	Yes	Original source folder for the record produced.
FILENAME	Document1.doc	N/A	Yes	Name of original electronic file as collected.
DOCEXT	DOC	N/A	Yes	File extension for email or e-doc
PAGES	2	Yes	Yes	Number of pages in the produced document or electronic file (not applicable to native file productions).
AUTHOR	John Smith	N/A	Yes	Author information as derived from the properties of the document.
DATECREATED	10/09/2005	N/A	Yes	Date that non-email file was created as extracted from file system metadata
DATELASTMOD	10/09/2005	N/A	Yes	Date that non-email file was modified as extracted from file system metadata
SUBJECT	Changes to Access Database	N/A	Yes	“Subject” field extracted from email message or metadata properties of the document
FROM	John Beech	N/A	Yes	“From” field extracted from email message
TO	Janice Birch	N/A	Yes	“To” field extracted from email message

CC	Frank Maple	N/A	Yes	“Cc” or “carbon copy” field extracted from email message
BCC	John Oakwood	N/A	Yes	“Bcc” or “blind carbon copy” field extracted from email message
DATESENT	10/10/2005	N/A	Yes	Sent date of email message (mm/dd/yyyy format)
TIMESENT	10:33 am	N/A	Yes	Sent time of email message, time zone set to EST
DATERCVD	10/10/2005	N/A	Yes	Received date of email message (mm/dd/yyyyformat)
TIMERCVD	10:33 am	N/A	Yes	Received time of email message, time zone set to EST
CONFIDENTIALITY	HIGHLY CONFIDENTIAL	Yes	Yes	Text of confidentiality designation, if any
TEXTPATH	Text\001\001\ABC0000001.txt	Yes	Yes	Path to *.txt file containing extracted or OCR text
PRODVOL	VOL001	Yes	Yes	Name of the Production Volume

A.13. Files Produced in Native Format. Any electronic file produced in native file format shall be given a file name consisting of a unique Bates number and, as applicable, a confidentiality designation; for example, “ABC00000002_Confidential.” For each native file produced, the production will include a *.tif image slipsheet indicating the production number of the native file and the confidentiality designation, and stating “File Provided Natively”. To the extent that it is available, the original file text shall be provided in a file-level multi-page UTF-8 text file with a text path provided in the *.dat file; otherwise the text contained on the slipsheet shall be provided in the *.txt file with the text path provided in the *.dat file.

A.14. Production Media. Unless otherwise agreed, documents and ESI will be produced on optical media (CD/DVD), external hard drive, secure FTP site, or similar electronic format. Such media should have an alphanumeric volume name; if a hard drive contains multiple volumes, each volume should be contained in an appropriately named folder at the root of the drive. Volumes should be numbered consecutively (ABC001, ABC002, etc.). Deliverable media should be labeled with the name of this action, the identity of the producing Party, and the following information: Volume name, production range(s), and date of delivery. Each production shall be encrypted and delivered separately from the decryption password.

ATTACHMENT B

The agreed upon custodians for search, search terms, and date range are listed below. To the extent the search terms to which the Parties agree result in excessive and/or overly burdensome results, the Parties will meet and confer in good faith to discuss any potential revisions to the search terms. Defendants agree to share hit reports for the search term keywords they claim result in a disproportionate amount of hits.

Custodian	Time Period	Keywords ¹
Jennifer Eckhart	January 1, 2013 through present	<ul style="list-style-type: none"> • Discrim! • Haras! • Hostil! • Unfair! • Justif! • Unjust! • Not w/4 fair! • Mistreat! • (Treat! OR Act!
